

Winpower AUE203G-30

802.11g/b Multi-Function Outdoor Radio

Using advanced OFDM and power amp technology, the AUE203G has high output power and amazing throughput even at long distance transmission. It operates at 2.4GHz band with 14+ non-overlapping channels. This 802.11g/b outdoor radio is an ideal solution for enterprise / campus connectivity, Hotspot and next-generation broadband wireless Access.

It's easier and more cost effective to deploy the wireless access environment with the Wireless Distribution System (WDS) technology. Saving 30% ~ 50% cost for telecom operators, ISPs and enterprises.

AUE203G has powerful security management because it supports WEP 64 / 128 / 152 bits, 802.1x Authentication (EAP), MAC access control, disable broadcast the SSID, client isolation, WPA-PSK and WPA encryption. All these functions make the network much more reliable.

APPLICATIONS

- Large area coverage hotspots
- Long distances P-T-P / P-T-MP Bridge
- Dedicated ISP connections for high-reliability base stations and subscribers
- Redundant links between buildings
- Enterprises or Institutions LAN and PBX extension
- Cost effective alternative to wired network environment

Product Highlights

➤ LARGE AREA COVERAGE

High output power for IEEE 802.11g/b up to 0.2W and low noise figure extend the signal transmit distance and enlarge the coverage area as well.

➤ IMPRESSIVE DATA RATE AT LONG DISTANCE

Unique OFDM technology breaks the distance limit of 802.11g/b standards. We succeeded in extending the signal up to 2~12 miles (3~20 Km) with the impressive 54Mbps (Max) data rate.

➤ MANAGEABILITY

Through the Web-based utility WP-202G is fully manageable locally and remotely. In addition, built-in SNMP support let ISP and enterprise users expand the network infrastructure much easier.

➤ FLEXIBILITY

This radio can play various roles in the wireless infrastructure due to the detachable antenna design. Customer can use the proper antenna according to the different environment, and make the wireless infrastructure deployment more flexible.

➤ RELIABILITY

The WP-202G is the most reliable outdoor radio which provides a trustworthy passageway in the air with stable and robust design.

➤ SECURITY

WEP 64 / 128 / 152bit encryption, WPA-PSK, WPA, 802.1x Authentication (EAP), disable broadcast the SSID, client isolation and MAC Access control build the highest security mechanism to prevent the malicious attacking from the internet.
